

Fennell Spring (www.fennellspring.com) in Horseheads, NY, offers precision compression, core, extension, torsion, and clutch springs and wire forms in diameters .005" to .3175" for prototype & production.

Genesee Global Group (www.geneseeglobal.com) in West Henrietta, NY, offers CNC 5-axis machining, automated fiber optic laser cutting for sheet metal fabrication, CNC forming press brakes, robotic & manual welding, multi-level bill of materials assembly, powder & wet painting, passivation & support with design for manufacturing.

Laszeray Technology (www.laszeray.com) in North Royalton, OH offers injection molding (including over molding, two & three shot, and insert with automated part handling & trimming), tooling for injection molding and investment casting, CNC machined components, and VA/VE Assemblies.

Marion Manufacturing (www.marionmfg.net) in Cheshire, CT, offers high-volume progressive die, four-slide, & verti-slide stamped custom components, wire forms, progressive eyelets, assemblies, and CNC machining.

Moreng Metal (www.morengmetal.com) in Totowa, NJ, offers sheet metal and structural steel fabrication, laser cutting, robotic and manual welding, punching, forming, machining, powder coating, assembly, & value-added engineering.

Ohio Screw Products (www.ohioscrew.com) in Elyria, OH, manufactures custom precision turned parts up to 2" diameter using CNC technology in both high and low volume.

Palladin Precision Products (www.palladin.com) in Waterbury, CT, utilizes Swiss CNC, Cam, and Escomatic turning lathes with turning capabilities in .010"- 1.00" diameter stock and CNC vertical milling in a variety of metals and plastics.

SICAM (www.sicam.com) in Hillsborough, NJ, offers 3D print solutions, rapid prototyping (urethane castings, injection molding, metal castings, and machined parts), and rapid tooling (3-5 weeks) for plastic injection molding and high-volume plastic injection molding.

TechnoTronix (www.technotronix.us) in Anaheim, CA, is an electronics manufacturer offering PCB layout, fabrication, box build, and wire harness/cable assembly for prototype, production, and turnkey services (including programming, testing, and conformal coating).
