

Headquartered in Newell, WV, the Marsh Bellofram Group of Companies is an AS9100D and ISO9001 certified manufacturer of high-performance OEM, industrial and process control instrumentation including synergistic products offerings from the divisions listed below.

Bellofram Elastomers (www.belloframelastomers.com) is a worldwide leader in the manufacturing of both static and dynamic silicone and rubber seals. Their extensive capabilities include extruded and molded dense and closed cell silicone sponge, closed cell silicone sheet products, engineered foam in EPDM and neoprene and fabric reinforced and homogeneous silicone and rubber diaphragms.

Automatic Timing & Controls (www.atcdiversified.com) manufactures highly rugged timers, counters, and PID (proportional-integral-derivative) controllers that are engineered to provide accurate and repeatable timing and monitoring operations in all types of industrial environments, including on the factory floor and in many OEM applications.

Diversified Electronics (www.atcdiversified.com) offers a broad range of devices for automation, motor protection, electrical safety, and power quality. These include time delay relays, voltage and current monitors, alternating relays, pump and level controls, seal failure alarms, isolated switches, and power quality meters.

Bellofram Precision Controls (www.mb-precisioncontrols.com) designs and manufactures air and gas pressure regulators, relays, servo pressure controllers, I/Ps and E/Ps, analog circuit card pressure transducers and regulators, diaphragm air cylinders, FRLs, and related accessories for critical OEM, industrial, and HVAC applications.

Marsh Medical (www.marsh-medical.com) offers solutions from the product lines above including pressure & flow regulators, electro-pneumatic pressure and flow controls, transducers, electronic timing controls, open medical power supplies, and other custom solutions.
